Art Unit: 3762

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the memory support (claims 24,25) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

56 2. Claims 11, 21⁶ are rejected under 35 U.S.C. 103(a) as being unpatentable over Powers et al (6360120) in view of Lin et al (6289243).

Art Unit: 3762

Figure 2a of Powers shows a cable 44, a station adapter 40 with memory inside, and sensors 42. Figure 4 of Lin shows a sensor adapter 44. To use such a sensor adapter would allow for different types of sensors to be used, and thus provide greater versatility to the device of Powers. Re claim 26, the memory device of Powers is considered to inherently be able to store cable-identification data if desired by the user.

3. Claims 11,26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powers et al in view of Hampele et al (5713927).

Figure 4 of Hampele shows a sensor adapter 15,15'. It would have been obvious to use such with the device of Powers for reasons mentioned supra. Re claim 26, as set forth above, the memory of Powers can inherently store any type of data.

Allowable Subject Matter

4. Claims 7-10,27-39 are allowed.

Since new rejections have been made, this action is not made final.
